

KUFU-WA

Stainless steel housing with cooling system

- Made out of stainless steel AISI304
- Specially designed for industrial uses to control the flames, furnaces and high temperature areas
- Independent cooling circuits for water and air
- Installer friendly
- Special front glass that allows the its constant cleaning
- Use dehydrated air for the cooling
- Useful internal dimensions 78x71x350 mm (WxHxL)

The housings come with bracket and joint and it is entirely made of stainless steel AISI304 therefore it can be used in environments with aggressive atmospheres such as in steel, chemical, cement and in industrial plants in general.

The KUFU.WA is available in two versions, respectively, cooled with water alone or water and air that makes it suitable to be used in facilities with the presence of high temperatures
